Editorial Index

AIR CARGO WORLD

Volume 77-1987 — Numbers 1-12

***Editor's Note:** This year's editorial index covers material from January 1987 through December 1987 issues of **Air Cargo World**. The index lists all feature stories and major department articles included in each of the year's issues.*

For easy reference, feature articles are indexed four ways: by exact title as published, under an author-subject heading, by individual author, and by a cross-reference by subject. All entries are followed by the month of issue and page number.

Five of the magazine's monthly departments have been listed under separate headings. Departments include: Editorial Note, Literature, Machinery and Equipment, News Update and Washington Wire. Also indexed are the monthly columns on Aircraft, Automation and Trucking, listed under those respective headings.

Other category headings have been broken down by listing major segments of the air cargo industry. For simplicity, all international flag carriers, commuters, and all-cargo airlines have been listed under Airlines. Industry headings include: Aircraft, Airlines, Air Industrial Parks, Airport Noise, Airports, Charters, Computers, Couriers, Customs, Express Operators, Forwarders, Japan Trade, Organizations, Regulatory Actions, and Security.
